Executive Summary

Cybersecurity & Digital Forensics student at Nanyang Polytechnic with 7 months of enterprise IT support experience at Income Insurance Limited. Skilled in network configuration, vulnerability assessment, traffic analysis, and data-driven troubleshooting. Eager to apply a strong technical foundation to contribute across enterprise networking, cybersecurity operations, and analytical roles.

Technical Skills

- **Security Operations & Penetration Testing:** OpenVAS, Nmap, Wireshark, Sguil, Kibana
- **Systems, Network & Cloud:** Operating Systems (Windows, Ubuntu, Kali Linux), Windows Server, Active Directory, Cisco Routing & Switching, Microsoft Azure (VMs)
- **Programming, Database & Web Development:** Python, Flask, SQL (MySQL, SQLite), HTML/CSS, JavaScript, Git/GitHub, Power BI, Figma

Education

Nanyang Polytechnic | Singapore

Diploma in Cybersecurity & Digital Forensic | Apr 2025 – Apr 2028 (Expected)

- **Academic Standing:** Cumulative GPA: 3.71 / 4.0
- **Relevant Coursework:** Applied Cryptography, Enterprise Networking, Web Application Development & Security, Database Design & Administration, AI & Data Analytics, Data Structures & Algorithms, Business Innovation & Enterprise
- **Honors & Awards:** Director's List (Top 15%, 2025), Edusave Academic Achievement Award (2026), Dell InnovateDash 2026 Finalist
- **Workshops & Conferences:** NYP Infosec Cybersecurity Day (2026), Cybersecurity 101 (2025), TicTacToe with NodeJS Workshop (2025)
- **Co-Curricular Activity:** Member, Board Games Club

ITE College Central | Singapore

Higher Nitec in Cyber & Network Security | Jan 2022 – Feb 2025

- **Academic Standing:** Cumulative GPA: 4.0 / 4.0
- **Honors & Awards:** Outstanding Graduate Award (2025), ST Engineering Book Prize (2025), Silver Course Medal (2025), Director's List (Top 10%, 2022–2024), Edusave Skills Award (2024)

Work Experience

Income Insurance Limited | Singapore

IT Support Specialist (Internship) | Sep 2023 – Apr 2024

- Imaged, provisioned, and configured enterprise desktops and laptops via OS cloning and standardized configuration baselines, ensuring consistent deployment across the organization.
- Enforced corporate endpoint security baselines and organizational policies across standard and BYOD devices to maintain compliance and reduce security risk.
- Managed IT asset lifecycles, tracking equipment check-outs, returns, and inventory records to ensure accurate accountability of hardware assets.
- Delivered remote and on-site Tier 1–2 technical support for system patching and software deployments, resolving hardware/software issues to minimize employee downtime.

Academic Projects

Enterprise Network Infrastructure & Routing Architecture | Cisco Packet Tracer, Cisco IOS, CLI

- Designed and configured a multi-site enterprise network topology using Cisco CLI, implementing OSPF dynamic routing, inter-VLAN routing, and NAT overload for scalable outbound access.
- Hardened network perimeter and internal segments by engineering inbound and outbound Access Control Lists (ACLs) to filter unauthorized external ICMP traffic and enforce least-privilege subnet isolation.

Virtual Server Vulnerability Assessment | Nmap, OpenVAS

- Provisioned and scanned two Linux virtual machines (Ubuntu, Debian) simulating an enterprise network, using Nmap for reconnaissance and OpenVAS/GVM for vulnerability detection to assess the network's overall security posture.
- Identified 18 vulnerabilities across SSL/TLS, SSH, and web application layers, mapped each to CVEs with CVSS severity scores, and documented prioritized remediation strategies.

Network Forensics & Ransomware Incident Investigation | Wireshark, Sguil, Kibana

- Investigated a simulated CryptoWall ransomware incident by analyzing PCAP files and NIDS logs via Wireshark, Sguil, and Kibana to trace the attack's origin and spread.
- Reconstructed a minute-by-minute attack timeline, identified critical IOCs (malicious iframe injection, exploit kit activity, C2 callback), and recommended mitigations including network segmentation and patch management.

Professional Training & Badges

- **Fortinet:** NSE 4 (FortiOS), Certified Associate in Cybersecurity (FCA), NSE 3 Certified in Cybersecurity
- **Cisco Networking Academy:** Cybersecurity Essentials, Introduction to Cybersecurity
- **Anthropic AI Fluency:** Framework & Foundations
- **IBM SkillsBuild:** Fundamentals of Sustainability and Technology, Web Development Fundamentals, User Experience Design Fundamentals

Languages

- English – Proficient
- Mandarin – Conversational
